ALCHEMY[®]

fine china

Excquisite fine china in a range of complementary designs to suit every mood and occasion.

- Dedicated research, talking to and understanding the needs of the world's top chefs.
- The clays used in Alchemy are specially selected for their incredibly white colour.
- Alchemy's fine china body has a combination of high Alumina content and specially selected clays.
- The whiteness of Alchemy is the perfect canvass for food.
- Alchemy is pin-fired, meaning the maximum surface area possible of each item is covered with glaze.
- This smooth "glazed" foot prevents damage when stacked or stored, and reduces the risks of bacterial contamination.
- It is a vitreous china body that does not absorb moisture, is more hygienic and has excellent heat retention properties.
- Its high resistance to thermal shock helps to reduce breakages.
- Alchemy is incredibly durable and strong.
- In addition, it is backed up by 5 year edge chip warranty (terms & conditions apply).

CHURCHILL®

super vitrified

The Churchill Super Vitrified body is one of the strongest in the world, delivering presentation that lasts. The Churchill Super Vitrified collection offers solutions for chefs that work in fast moving, professionally disciplined back of house environments. Professionals demand the best performance time and time again - and want products with a proven track record.

- Churchill Super Vitrified is one of the strongest ceramic materials in the world maintaining strength and good presentation over a long period of time.
- It's strength enables you to maintain presentation, and, means you don't have to worry about replacing chipped or damaged ware.
- CAD engineered for the perfect balance between weight, thickness, size and aesthetics - Churchill Super Vitrified is engineered for performance.
- Churchill is incredibly resistant to corrosive dishwasher chemicals. This means that the glossy shine of the product last for longer, and, that it is more resistant to metal marking because the chemicals in the dishwasher detergents erode the glaze of inferior crockery much faster.
- This higher quality glaze finish also contributes to the dishwasher and metal marking resistance of the crockery.
- Churchill Super Vitrified is a vitreous body that does not absorb moisture, more hygienic, and has better heat retention properties.
- High resistance to thermal shock helps to reduce breakages.
- In addition it is backed up by 5 year edge chip warranty (terms & conditions apply).

Stonecast®

Each piece is unique

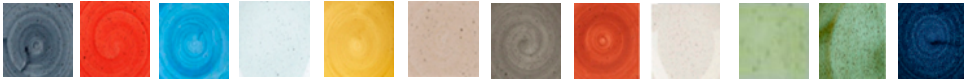

Stonecast is an exciting collection of hand finished ceramics from Churchill, designed in different styles to suit all manner of hospitality environments. Available in a variety of versatile designs, from the iconic original Stonecast range to innovative new designs such as semi-matte Stonecast Raw and minimal Stonecast Accents, while rustic Stonecast Melamine complements the ceramics collection, enhancing food displays. The nature of the ceramic manufacturing process means that every piece of stonecast will be slightly different, adding to the overall charm of the collection.

This collection of rustic and hand decorated products is inspired by the changing seasons and fresh ingredients. Revived from a design in the Churchill archives dating back to the days of the James Broadhurst factory. Stonecast is hand decorated with a fine speckle and rustic edge in a rich golden brown.
