CHURCHILL®

super vitrified

The Churchill Super Vitrified body is one of the strongest in the world, delivering presentation that lasts. The Churchill Super Vitrified collection offers solutions for chefs that work in fast moving, professionally disciplined back of house environments. Professionals demand the best performance - and want products with a proven track record.

- Churchill Super Vitrified is one of the strongest ceramic materials in the world maintaining strength and good presentation over a long period of time.
- It's strength enables you to maintain presentation meaning you don't have to worry about replacing chipped or damaged ware.
- CAD engineered for the perfect balance between weight, thickness, size and aesthetics - Churchill Super Vitrified is engineered for performance.
- Churchill is incredibly resistant to corrosive dishwasher chemicals. This means that the glossy shine of the product last longer and is more resistant to metal marking as the chemicals in the dishwasher detergents erode the glaze of inferior crockery much faster.
- This higher quality glaze finish also contributes to the dishwasher and metal marking resistance of the crockery.
- Churchill Super Vitrified is a vitreous body that does not absorb moisture making it more hygienic with better heat retention properties.
- High resistance to thermal shock helps to reduce breakages.
- In addition it is backed up by 5 year edge chip warranty (terms & conditions apply).
